EXAMINER'S AMENDMENT

This application is in condition for allowance except for the presence of claims 11 to 12 non-elected without traverse. Accordingly, claims 11-12 have been cancelled.

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2,4-7,9-10 and13-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches a reflective liquid crystal display device comprising various elements as claimed, more specifically, as the following:

a passivation film formed on the capacitor upper electrode, and the passivation film is formed between the capacitor upper electrode and the reflective electrode, whereby a depression at the pixel electrode is improved [claims 1 and 5].

The closest references AAPA and US 6,362,507 (Ogawa et al) discloses a structure of a liquid crystal display device having a passivation film formed over a storage capacitor, but there is a contact hole in the passivation film using for a reflective electrode contact the capacitor upper electrode, so that having a depression problem in the pixel region. Ogawa discloses a structure of an electro-optical device using several interlayer insulating films over the storage capacitor, but that is not only one insulating film as a passivation film as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
